Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

The examiner noticed many applications filed that appear to be relevant to the present application. The examiner requests applicants to list on a 1449 all relevant applications and any references received or known to applicants, which applicants believe are relevant to the particulars of the present application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 3, 5 – 11, 13 – 20 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application No. 2004/0193343 (Tan et al.).

With respect to claims 1 – 3, 6 – 11 and 15 - 20, note Figs. 3 – 6, Paragraphs 007 – 0010, 0019 – 0024 and 0029, (the preset ID reads on the MIN). If the service provider has not activated the MIN, the user will know to trigger the device again.

With respect to claims 5 and 13, if the user record is in the system, it is expected.

With respect to claims 6 and 14, if the service is activated a number will be available.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tan et al. in view of U.S. Patent Application No. 2003/0190030 (Alton).

Tan et al. teach the claimed device except for the predetermined time aspect. Note that Alton teaches a timer for enforcing a predetermined time for disconnecting a call. It would have been obvious to one of ordinary skill in the art to have incorporate such a predetermined timing means as taught by Alton into the Tan et al. device in order to free a user from having to remember to trigger the request manually. The examiner realizes that Alton's means disconnects a call at a predetermined time however; it would have been obvious to one of ordinary skill in the art to have used a timer to connect a call at a predetermined time in light of Alton.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the Figs. and Abstracts of the references cited on the accompanying of the 892.
